Center Hill Mine
Discharge Water Monitoring Reports
Industrial Wastewater Permit # FL031895-001-IW3S**

Tt HAI# 05.0039.001/ 12.0

Dear Ms. Rogers:

Upon review of the National Pollution Discharge Elimination System (NPDES) reporting forms for the above mine, Tetra Tech HAI (Tt HAI) has concluded that the reports do not show any exceedances of the current NPDES parameters for industrial sites, for the period from January 2006 to March 2006 for the Center Hill Mine. Several detections of oil and grease were identified throughout the monthly reports for the above mine, but none exceeded the daily maximum limit of 5.0 mg/L. Low turbidity levels were also identified in the NPDES reports for the Center Hill Mine, although none exceeded the FDEP maximum limits for this permit.

As always, Tt HAI appreciates the opportunity to provide environmental services to Sumter County. Please call me if you have any questions.

Very truly yours,

Tetra Tech HAI
